

Abts Super Duty Crowd Gate

Features of our crowd gate that will benefit your dairy:

- Lifts in multiple positions
- No matter how wide our crowd gate will not sag
- Gate lifts with very low air pressure, typically under 50psi
- Wider widths are supported because of its heavy duty super structure
- Custom widths available
- Available in either galvanized or stainless steel structure
- Air transferred to center of the crowd gate using structural piping

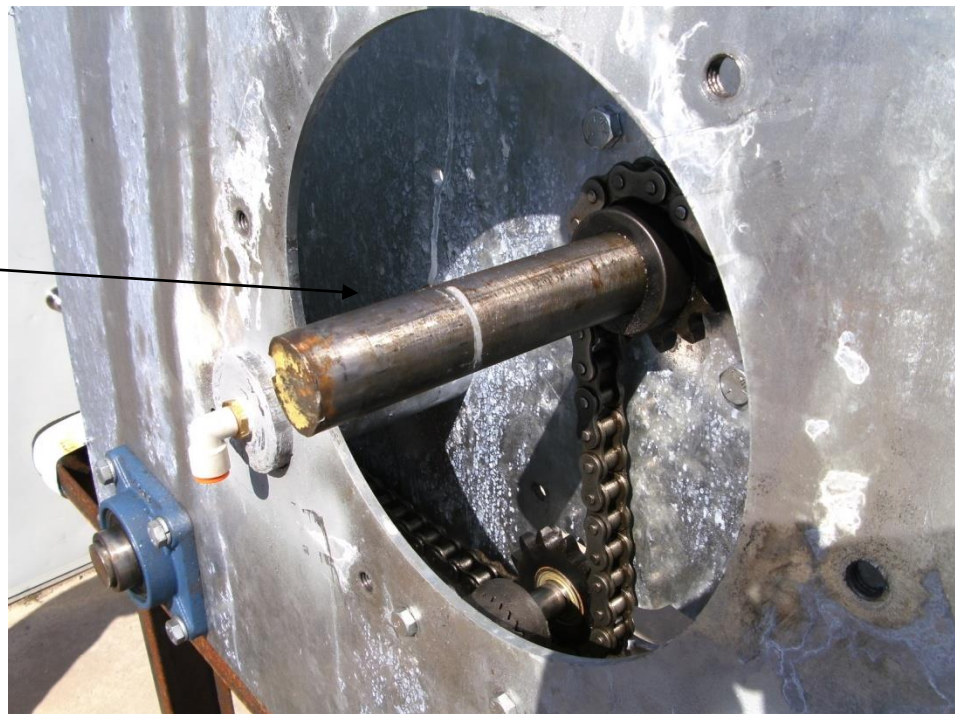

-10" polyurethane extra heavy duty drive wheels

-1 1/2" shaft with keyed drive wheels along with extra heavy duty bearings

-Easy access to chain and gears for repairs

-#60 roller bearing chain for drive

-Self storing alligator tracking organizes air hoses to the crowd gate to prevent sagging, curling, or kinking of air hoses.
